

The Specialists in The Ear Clinic:

Dr Rosario CERUNDOLO

DVM CertVD MRCVS Diplomat, ECVD

European & RCVS - Recognised Specialist in Veterinary Dermatology

Rosario is an Internationally-recognised specialist in dermatology. He completed his specialist training at The Royal Veterinary College before joining the Dermatology Service at the Veterinary Hospital of the University of Pennsylvania in Philadelphia. He is a Past President of the European College of Veterinary Dermatologists and has wide experience in all aspects of dermatology; he is particularly interested in the skin conditions that underlie ear disease.

Dr Giunio Bruto CHERUBINI

DVM MRCVS Diplomat, ECVN

European & RCVS-Recognised Specialist in Veterinary Neurology

Giunio is a specialist in neurological disease who also completed his specialist training at The Royal Veterinary College. He joined Dick White Referrals to set up both the Neurology Service and the MRI facility. He provides a comprehensive Neurology and Neurosurgery service and has extensive experience of diagnosing and managing patients with neurological complications caused by ear disease.

Professor Dick WHITE

BVetMed PhD DSAS DVR FRCVS

Diplomat, ACVS Diplomat, ECVS

American, European and RCVS-Recognised Specialist in Small Animal Surgery

RCVS-Recognised Specialist in Veterinary Oncology

One of Europe's leading small animal surgeons, Dick has more than 30 years of specialist experience in the surgical management of conditions involving the ear, nose and throat. He holds specialist surgical qualifications in the UK, Europe and US and is also a recognised specialist in the surgical management of cancer disease. He has published widely on the management of ear disease in dogs and cats and is the author of 'Surgery of the Middle and Inner Ear' in Slatter's 'Textbook of Small Animal Surgery'.

What The Ear Clinic offers:

- A comprehensive assessment of the patient with ear disease
- Video-otoscopic examination
- In-house cytological examination of samples from the ear
- Myringotomy and middle ear sampling

Dermatology

- Investigation of underlying dermatological diseases including where necessary, allergy testing
- Specialist fungal and bacterial isolation
- Management of underlying skin disease and particularly resistant bacterial infections

Neurology

- Neurological assessment of middle and inner ear complications (e.g. bacterial meningitis, vestibular syndrome, facial paralysis, Horner's syndrome)
- State of the art MRI imaging for the diagnosis of otitis media, otitis interna and associated brain lesions
- Electrophysiological investigations, including BAER hearing tests

Surgery

Surgical interventions for:

- 'end-stage' external ear disease
- otitis media / interna
- middle ear polyp disease in cats
- tumour disease
