

Dick White Referrals

CENTRE OF VETERINARY EXCELLENCE

Diagnostic Imaging

At Dick White Referrals, our in-house Diagnostic Imaging Service is at the centre of all clinical activities, providing vital support to the Specialists in each of the veterinary disciplines. The comprehensive expertise and technology available encompasses magnetic resonance imaging (MRI), ultrasound, computed radiography (CR), fluoroscopy and echocardiography. These sophisticated modalities, which can be used individually or in combination, provide high quality images which represent invaluable tools for diagnosis, treatment or interventional radiology (IR). The imaging facilities are available to our clinicians 24 hours a day, 7 days a week, and are essential to provide prompt and accurate diagnoses for referring vets, their clients and our patients.

Our Diagnostic Imaging Service is headed by Sam Jakovljevic, DipECVDI, supported by a team of radiologists and radiographers. The team regularly provides training for veterinarians wishing to specialise and obtain a post graduate qualification at either the Certificate or the Diploma level.

What the Diagnostic Imaging Service offers

- Diagnostic Imaging Service available 24 hours per day, 365 days a year
- Team of highly qualified Specialists
- On-site magnetic resonance imaging (MRI) scanner
- State-of-the-art ultrasound
- Computed radiography system
- Echocardiography
- Fluoroscopy
- Access to scintigraphy and computed tomography
- Digital image archiving (PACS)
- Ultrasound-guided procedures
- Ultrasound contrast studies
- Interventional Radiology
- Special radiographic techniques
- Participation in BVA Scoring Schemes
- Diagnostic Imaging reporting service
- Training available to Certificate and Diploma levels
