

Dick White Referrals

CENTRE OF VETERINARY EXCELLENCE

Internal Medicine Service

Welcome to the Dick White Referrals Internal Medicine Service where we are proud to offer a comprehensive range of expertise in all aspects of internal medicine. Our 3 internationally renowned, Board-certified Specialists are highly motivated and bring a wealth of experience to the service. They are supported by 2 Residents in an ECVIM-approved training programme and a team of dedicated and highly experienced internal medicine nurses. Medicine is a collaborative endeavour and our level of service is greatly enhanced by the availability of, and integration with, our Specialist colleagues in other disciplines. This ensures that all patients benefit from the multi-disciplinary expertise at our disposal.

Dick White Referrals has one of the busiest internal medicine services in the UK, seeing over 2,000 challenging cases each year. We have accumulated a wealth of experience and constantly strive to build excellent relationships with referring veterinarians, whom we view very much as part of our team. We aim to provide an excellent level of communication throughout, and beyond, the referral process and we are always happy to provide follow-up advice when requested or simply to be contacted for guidance on a case when required.

What the Internal Medicine Clinic provides:

- Highly experienced Specialists available at all times, including a 24 hours per day, 365 days a year emergency service
- Support from on-site Specialists in other disciplines, including anaesthesiology, clinical pathology, dermatology, neurology, oncology, orthopaedics and soft tissue surgery
- Advanced diagnostic imaging facilities with attendant Diagnostic Imaging Specialists who can provide interpretation and discuss their findings with us at the time the images are acquired
- Facilities for intensive management of critically ill patients and round-the-clock veterinary and nursing care
- Climate-controlled in-patient wards
- A comprehensive cardiorespiratory service
- Out-patient Oncology clinic
- On-site Clinical Pathology Laboratory run by a Specialist Veterinary Clinical Pathologist
- A full range of diagnostic and therapeutic endoscopy procedures
- Timely case communication and thorough follow-up
- Available, approachable clinicians offering friendly practical advice
